OBJECTIVE

As a third-year Software Engineering student at FPT University, I have developed a strong foundation in programming and software development. I am eager to apply my knowledge to real-world projects, collaborate with others, and continuously improve my skills through new challenges.

In the future, I aim to specialize in backend development to gain a deeper understanding of system architecture and infrastructure. I am also interested in learning cybersecurity to build more secure and reliable systems.

EDUCATION

Hanoi, Vietnam

FPT University

Sep 2023 - Sep 2027

- Bachelor of Software Engineering
- Relevant Coursework: Data Structures, Algorithms, Database Systems, Software Engineering.

CERTIFICATIONS

- [KS57 1 Digital Ecosystem: From Governance to Business learning path](#)
- [Software Development Lifecycle](#)
- [Web Design for Everybody: Basics of Web Development & Coding](#)
- [AI for Everyone](#)
- [Academic Skills for University Success](#)

EXPERIENCE

Backend Developer

HDSOFT

Dec 2025 – Present

- Developed backend features using ASP.NET and Razor Pages
- Implemented email functionality using Gmail service for automated notifications
- Built file import/export features, including uploading and downloading Excel files, CSV file for data management
- Developed logging system to track user activities and system events
- Developed basic CRUD functionalities for core modules in the system

PROJECTS

Developer

Ocean's Portfolio Website

Jul 2025 – Aug 2025

- **GitHub:** [PortfolioGitHub](#) **Product:** [PortfolioProduct](#)
- **Descriptions:** Developed and deployed a personal portfolio website to showcase technical skills, featured projects, and professional experience. The platform also serves as a hub for networking, enabling potential collaborators and recruiters to explore projects. Focused on building a responsive, high-performance, and scalable system with a modern user interface and optimized backend services.
- **Responsibilities & Achievements:**
 - Designed and implemented RESTful APIs using Node.js (Express) to handle project data, user interactions, and dynamic content rendering.
 - Integrated cloud services such as Firebase and Supabase for authentication, database management, and real-time data handling.
 - Built interactive and visually engaging UI components using ReactJS and Three.js to enhance user experience.
 - Optimized application performance through efficient state management and API handling.

- Ensured application security by applying best practices such as input validation, API protection, and secure data handling.
- Deployed and maintained the application, ensuring stability and scalability
- **Tech stack:** JavaScript, ReactJS, ThreeJS, NodeJS(Express), Firebase, Supabase.

Development Team Member MedSchedule Website Jan 2026 – Mar 2026

- **GitHub:** [MedScheduleGitHub](#) **Product:** [MedScheduleProduct](#)
- **Descriptions:** Developed a fullstack Medical Appointment Management System to digitize and streamline clinical workflows, supporting multiple roles such as Adult Patients, Kid Patients, Doctors, Receptionists, Accountants, Lab Doctors and Administrators.
- **Responsibilities & Achievements:**
 - Implemented authentication module using Supabase Auth, including OTP verification and secure login flows
 - Developed CRUD APIs for Admin role to manage users, services, and system data
 - Integrated email service (Gmail API) for sending OTPs and automated system notifications
 - Built image upload functionality using Supabase Storage for managing user-related assets
 - Applied backend best practices including input validation, error handling, and secure API design
 - Collaborated in frontend integration using React to ensure smooth data flow between client and server
- **Tech stack:** JavaScript, ReactJS (Vite), Node.js (Express), Supabase (Auth, PostgreSQL, Storage), Gmail API (sendgrid/mail)

Development Team Member MedSchedule Website Jan 2026 – Mar 2026

- **GitHub:** [GundamShopGitHub](#) **Product:** [GundamShopProduct](#)
- **Descriptions:** Contributed to the development of a fullstack e-commerce platform for browsing and purchasing Gundam models, supporting product management, shopping cart, and order processing workflows.
- **Responsibilities & Achievements:**
 - Implemented authentication module using Supabase Auth, including secure login and session management
 - Applied security best practices such as input validation, protected API routes, and role-based access control (RBAC)
 - Developed RESTful CRUD APIs for Admin module to manage products, categories, and users
 - Built product management module, including image upload and storage using MongoDB Storage
 - Ensured secure handling of user data and API requests across the system
 - Collaborated with frontend (React) to integrate APIs and maintain consistent data flow
- **Tech stack:** JavaScript, ReactJS (Vite), Node.js (Express), MongoDB (NoSQL, Storage), Firebase (Auth)

AWARDS

- First Prize - Scientific Research & Innovation Competition - University of Languages and International Studies (VNU)
- Top 8 - CodeFest 2024 - JSclub - FPT University Hanoi
- Top 8 - Startup Olympics 2025 - National Economics University (NEU)

SKILLS

- **Languages:** English | Vietnamese: native
- **Programming languages:** JavaScript, Java, C#
- **Others:** Git/Github, Postman, Blender
